Skills

- C#/.NET
- HTML5
- CSS3
- JavaScript
- React
- Java
- SQL

Career Objective

I am a full-stack software developer trained at Nashville Software School, and I have worked extensively to develop my understanding of the theory and application of strongly-typed software languages. I am looking to apply these object-oriented programming skills in a challenging and varied work environment. I seek to become a valuable member of a software development team that will push me to advance both the software resources of prospective employers and my own expertise.

Software Development Training

Full-Stack Web Development Cohort 49, Nashville Software School

- Six-month full-time software development bootcamp with collaborative, lab-based learning in HTML, CSS, Javascript, React, C#, .NET, and SQL
- Extensive use of Git version control and Agile-style methodologies to simulate actual work environments

Java Masterclass by The Learn Programming Academy

- 80-hour online course focusing on object-oriented programming in Java 11

SC Codes by Build Carolina and the S. C. Department of Commerce

- Online introductory courses in HTML, CSS, and JavaScript
- Monthly meetups assisting new members with coursework and other educational exercises

Projects

In the Bag : HTML, CSS, JavaScript, React

- A clean, lightweight disc golf bag-building application designed to give new players and clubs an easy way to find disc flight information with a simple search and click

github.com/joelbeckum/capstone-in-the-bag

Nash_IRL : HTML, CSS, Bootstrap, ASP.NET MVC, SQL/T-SQL

- A simple social meetup app for friends to organize events by hobbies and interests

github.com/joelbeckum/NashIRL

PatientTracker : Java 11, SQL

- A hospital room management application designed for easy assignment of nurses and patients to rooms

github.com/joelbeckum/PatientTracker

Truncheons and Flagons: HTML, CSS, JavaScript

- A collaborative tavern game scoreboard application designed to test our skills at managing application state in vanilla JavaScript

github.com/joelbeckum/truncheons-and-flagons

Work History

Advyon Business Technologies (Position: IT Technician)

Location: Summerville, South Carolina

Dates: September 2020 - May 2021
